

Annual percentage rates of Inbank products under sample conditions

Here you can view examples of annual percentage rates, which allow you to conveniently assess the estimated costs of a loan product you are interested in, calculated on the example of an average agreement. If you contact us with a specific loan request, we will calculate the annual percentage rate charge on the basis of the conditions offered to you, which may differ from the rates given here.

Please be advised that every loan is a financial obligation and you should carefully consider your decision, read the loan terms and conditions and consult experts where necessary before entering into a loan agreement.
