

Engineering Lead

Inbank is a financial institution whose roots go back to 2010 and which offers credit and deposit products on four European markets. But our ambitions go even further. We are building a new kind of bank with the cornerstone of our strategy being masterful financial technology and geographic expansion. We are looking for talented people to contribute to the Estonian banking sector's success story here and elsewhere in Europe.

As the wingman of CTO your mission is to lead the development of Inbank systems. You will work closely with our in-house development teams and outsourced partners. We have several ambitious goals ahead that offer plenty of engineering joy. If you like smaller and dynamic organizations, international environment and friendly colleagues - then you are the one we are looking for.

JOB DESCRIPTION

- Design, define and guide the architecture of our systems
- Lead and support developers daily in their choices, hands on
- Help our business development team designing novel solutions
- Tune and improve our development process as we grow
- Create and maintain knowledge about the systems

WE OFFER

- Highly competitive salaries and benefits packages, negotiable based on your experience and skill level.
- You'll get to work flexible hours and enjoy a fully stocked kitchen in our cozy modern office in Kalamaja, the trendiest part of town. We're also open to remote working options.
- We're agile and have a high-performance development culture and plenty of startup spirit.

YOU WILL FIT WELL IF

- You have 5+ years of experience as a software developer, varied programming languages
- You have the ability to clearly express software architecture vision
- You have leadership skills and you take responsibility
- You focus on practical solutions and the things that matter
- You are comfortable collaborating with non-technical colleagues
- Your English is fluent
- You are a friendly person who is fun to work with
